

ReMOTE 25/49 SL COMPACT

Compact 2- and 4- octave MIDI controllers featuring Automap Universal

ANY PLUG-IN | ANY SEQUENCER | AUTOMATIC CONTROL

25-KEY

AUTOMAP UNIVERSAL
PLUG-IN

Finally, a MIDI controller that does what it's supposed to. The ReMOTE SL COMPACT combines a huge LCD screen and an incredible array of assignable controls with Novation's Automap Universal technology, providing an affordable route to automatic and intelligent control of all major sequencers and all automatable plug-ins. Automap Universal software ensures that little or no user setup is required. Sequencer controls are automatically mapped to the SL COMPACT the moment the sequencer boots up, whilst all VST or AU parameters are intuitively assigned as soon as the plug-in opens. In addition, an instant click and control 'learn' function is available for quick custom assigning, providing personalised plug-in control.

- **Automap Universal** - Instant control over sequencers and plug-ins. Removes the pain and time involved in assigning MIDI parameters.
- **Giant 144-character LCD screen** - Places all the essential data right alongside the relevant controls.
- **Semi-weighted keyboard with aftertouch** - Delivers the feeling of playing an instrument, rather than a computer peripheral.
- **The amazing Speed Dial** - Featuring PAC (Pointer Assigned Control) technology enables the Speed Dial to take instant control of whatever the mouse points to.
- **Huge array of controls suitable for every need** - The controls you need with the control setup you desire, no matter how complex the plug-in.
- **Large programmable drum pads** - Eradicates the need for separate drumpad triggers, providing the ideal platform for sketching out beats.
- **Dedicated transport controls** - Sequencer transport controls are immediately to hand (play/record etc.), reducing reliance on mouse and screen.
- **MIDI I/O** - Control hardware synths, or expand the control surface.
- **USB bus powering** - No wall wart, no hassle. USB leaves you free to make music wherever, and whenever you like.
- **Class compliant with Windows XP and Mac OSX** - Simply plug and play.
- **Includes the Xcite + bundle** - The finest software bundle to date, including Ableton Live Lite 6, a host of instruments and effects, and over 1.5 gigs of loops and samples.

49-KEY

Huge 144-Character LCD screen displays all the relevant data

Superb semi-weighted keyboard with aftertouch

A unique and easily assignable knob - Push to instantly control whatever parameter your mouse points to!

What is Automap Universal?

Automap universal is Novation's unique MIDI control protocol, providing automatic control of any automatable plug-in within any sequencer. Automap Universal removes the pain inherent in old school MIDI control, leaving you free to focus on your music. Simply open up a plug-in and the parameters automatically appear across a 144-character LCD screen. Every plug-in is also given a 'learn' mode for easy and instantaneous mapping of controls - simply click a plug-in parameter, then move a hardware control to assign. Open up any major sequencer and the mixer controls and other parameters also instantly map to the SL COMPACT. A single button allows you to switch between controlling different plug-ins and the mixer, with all names and values displayed on the SL COMPACT.
